

$S(0)$

```
graph TD; S0[S(0)] --> Chayma[Chayma]; S0 --> QFF[QFF]; Chayma --> Eft[ $\mathbb{E}[f(S_T)]$ ]; QFF --> Eft; Eft --> Settlement[Settlement];
```

The diagram is a flowchart with five nodes. The top node is an orange rounded rectangle labeled $S(0)$. Two orange arrows point from this node to two pink rounded rectangles below it: 'Chayma' on the left and 'QFF' on the right. From 'Chayma' and 'QFF', two orange arrows point to a central orange rounded rectangle labeled $\mathbb{E}[f(S_T)]$. Finally, an orange arrow points from this central node to a pink rounded rectangle at the bottom labeled 'Settlement'.
